Container glass, pure class

Welcome to Gallo Glass, leading California into a new era of sustainable, reliable wine and spirits glass. Based in the heart of California, we are perfectly positioned to support our customers across the West Coast with exceptional quality, flexible supply and outstanding service.

Gallo Glass is a state-of-the-art manufacturing plant, with significant and ongoing investments in the latest technologies delivering continuity of glass supply for the long-term. As the largest glass container plant in the US, and the only glass company dedicated to wine and spirits, we produce over 80 million cases annually, making up over 50% of all domestic West Coast supply. With over 40% of our capacity dedicated to customers beyond the Gallo network, our commitment and ability to serve the diverse needs of the broader West Coast wine and spirits market is proven. Our expertise is unmatched and our commitment to continual improvement in our products and to local, personalized customer service is best-in-class.

A photograph of three yellow glass bottles on a production line. The bottles are positioned in front of a bright, rectangular light source, which creates a strong backlight effect, making the bottles appear as glowing yellow shapes against a dark background. The bottles are held in place by a dark metal frame or conveyor system. The overall scene is industrial and focused on the clarity and quality of the glass.

Quality that's clear

If one word defines our reputation among our customers at Gallo Glass, that word would be “quality.” From our products to our service, we not only set the standards in glass container manufacturing, we raise those standards every year.

Gallo Glass is best-in-class. We continuously invest time and money in elevating quality control across the business, from cutting-edge equipment to comprehensive training for our outstanding staff. Our innovative technology includes four oxy-fired furnaces and fourteen unique individual section forming machine lines. Our exceptional facility in the heart of the San Joaquin Valley attracts leading glassmakers from across the world to become members of our diverse team of experts.

We are ISO 14001 (environmental management) and ISO 22000 (food safety) certified, with a commitment to providing a safe and healthy workplace, manufacturing quality products in an environmentally responsible and energy-efficient manner.

Our unwavering commitment to excellence and continuous innovation has established Gallo Glass as a direct source of reliable, high-quality glass containers loved by customers across the West Coast and beyond. We pride ourselves on outstanding personalized service.

Looking after tomorrow – We are California Pure

At Gallo Glass, commitment to clean manufacturing is one of our core values, running through every aspect of our operations and business. We are so proud to be leading the revolution into a new era of sustainable container glass.

Made from all-natural materials, our glass is 100% recyclable and ocean-safe, with each of our bottles containing up to 75% recycled glass. The majority of our raw materials are sourced from California, minimizing the environmental impact of transportation, while also supporting our local economy.

With four energy-efficient oxy-fired furnaces, we are committed to upholding the highest environmental standards. Our entire business is engineered to support and meet California's

climate change initiatives and goals. By introducing oxy-fuel technology to our operations, we reduced our NO_x emissions by 80% – equivalent to taking over 97,000 cars off the road.

Our team is not only passionate about glass, but also about protecting the future of our planet. That passion includes care for our Modesto community. We support social and environmental projects from the cleaning of the Tuolumne River and local parks, to providing holiday meal boxes and gifts, as well as donating backpacks and school supplies to students.

Rooted in California's wine industry and tradition, we are proud of our over 65-year history of glassmaking excellence, but even more proud of our continued commitment to the future.
